

Greater Manchester Joint Waste Development Plan Document: Additional consultation on areas in Wigan

A Joint Waste Development Plan Document ('Waste Plan') is being prepared on behalf of the ten Greater Manchester Authorities to provide the basis for planning for the future provision of the necessary waste management infrastructure in Greater Manchester.

To ensure the Waste Plan reflects the reality of the issues we face and our aspiration to deal with those issues, we are seeking the views of relevant statutory stakeholders and other interested organisations and individuals.

Following consultation on Greater Manchester Waste Plan Preferred Options in November 2009 a revision of the Wigan Municipal Waste Strategy has led to the requirement to reconsider three locations which may be suitable for development of built waste management facilities.

Before these sites can be considered as part of the next stage of the Waste Plan, the Publication stage it is necessary to carry out a period of consultation on these sites. As a result the *Additional consultation on areas in Wigan* report has been produced and is the subject of a formal four-week period of consultation from **Friday 18th June and ends on Friday 16th July 2010**. Representations received during this period will be carefully considered and used to inform the development of the Joint Waste Development Plan Document.

The relevant strategy and policy which will guide the final decision on all sites has already been subject to consultation. Therefore the *Additional consultation on areas in Wigan* report contains the detailed information on the additional sites only. The following representation form includes the questions that are contained within the report. **It should be read in conjunction with the previous stages of the Waste Plan.**

Please return your completed form to:

Planning Team
Greater Manchester Geological Unit
Emerson House
Albert Street
Eccles
M30 0TE

To receive an electronic version of this form please e-mail:
planningteam@gmwastedpd.co.uk.

Alternatively, comments can be submitted on-line at www.gmwastedpd.co.uk.

Question 1

Do you think that the areas put forward in this document as potentially suitable for built waste management facilities are acceptable? (Please state the reasons why you do or do not consider them to be acceptable).
